2022-2026-CSE-C

Aim:

Write a program to print the multiplication table for a given number with the number of rows in the table.

For example, for a number 2 with 3 rows, the output should be:

```
2 * 1 = 2
2 * 2 = 4
2 * 3 = 6
```

At the time of execution, the program should print the following messages one by one on the console as:

```
Enter an integer number :
Enter number of rows :
```

For example, if the user gives the input as:

```
Enter an integer number : 5
Enter number of rows : 4
```

then the program should **print** the result as:

```
5 * 1 = 5
5 * 2 = 10
5 * 3 = 15
5 * 4 = 20
```

Note: Do use the **printf()** function with a **newline** character (\n).

Source Code:

Program411.c

```
#include <stdio.h>
int main()
{
   int num,row,i;
   printf("Enter an integer number : ");
   scanf("%i",&num);
   printf("Enter number of rows : ");
   scanf("%i",&row);
   for(i=1;i<=row;i++)
   {
      printf("%d * %d = %d\n",num,i,num*i);
   }
}</pre>
```
